

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

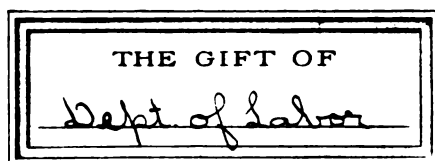

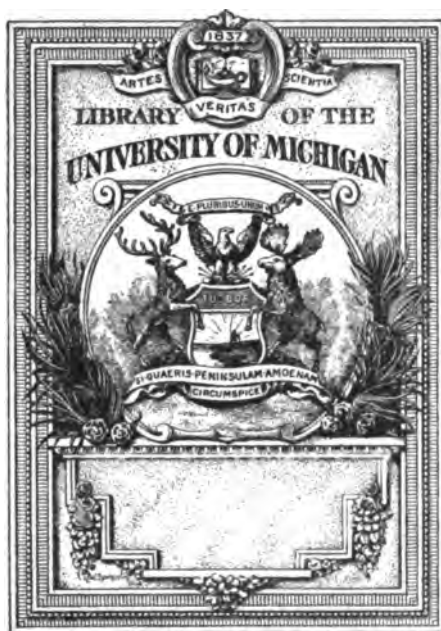

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

NEW YORK STATE DEPARTMENT OF LABOR

# L

## TRADE UNIONS IN 1904.

For the first time in seven years organized labor in New York has failed to increase its numerical strength. Beginning with small gains in 1898; the movement thereafter made rapid progress, culminating in 1903 in an increase of 66,500 members, or one-fifth of its membership at the end of the preceding fiscal year. In the decade 1894-1903 the number of labor organizations in New York increased from 860 to 2,583, and the number of adherents from 157,197 to 395,598. The number would have exceeded 400,000 if the Bureau had included in its returns a large union of building laborers recently formed in New York City. The circumstance that this union, with its 10,000 members, was added to the rolls after the close of the official year 1903, kept up the figures of aggregate membership in March, 1904; but thereafter the decline was not concealed by such fortuitous gains, thus:

TABLE 1.\*

		ORGANIZA- TIONS.		MEMBERSHIP.			Increase (+) or decrease (—).

1903.	September 30...	2,583	354	380,845	14,753	395,598	66,479+	20.2+
1904.	September 30...	2,504	†79—	378,859	12,817	391,676	3,922—	9.9—
(1904.	March 31.....	2,555	.....	385,533	14,166	399,699)	.....	.....

Between September, 1903, and March, 1904, the number of workmen's protective organizations decreased by 28 and in the succeeding six months by 51, making a net loss for the year of 79. In this period 254 new organizations were formed, but on the other hand 333 existing unions disappeared, either through amalgamation or disbandment. The net loss in membership was apparently 3,922; but in fact was about 13,900, owing to the important omission noted in the preceding paragraph. At the

\* In 1888 there were 826 labor organizations in New York, but not all of them reported their membership to the Bureau. The 580 unions that made such reports had 118,628 members; assuming that the remaining 146 unions averaged the same number of members, the aggregate membership of all unions in 1888 would have been 169,000, or about 12,000 more than in 1894, when industry was in the midst of an unusually severe depression.

† Decrease.

end of September, 1904, the total number of members of New York unions was 391,676, of whom 378,859 were men and 12,817 women and girls.

#### CITIES AND VILLAGES.

Of the aggregate membership of the unions, New York City contained 65 per cent, Buffalo 9 per cent, Rochester 3 per cent, Syracuse and Albany each 2 per cent, Schenectady  $1\frac{1}{2}$  per cent and Troy and Utica each slightly more than 1 per cent. The eight leading cities combined claim 85 per cent of all union men and women in the State, thus:

TABLE 2.—PERCENTAGE OF TRADE UNIONISTS IN THE STATE AT THE END OF SEPTEMBER, BELONGING TO ORGANIZATIONS IN—

CITY.	1898.	1899.	1900.	1901.	1902.	1903.	1904.	Popu- lation, 1900.
New York City.....	73.3	67.9	63.0	63.0	60.2	61.7	65.0	47.3
Buffalo.....	5.2	7.9	10.8	9.7	8.0	8.3	8.6	4.8
Rochester.....	2.6	3.5	3.7	3.4	3.5	3.3	3.1	2.4
Syracuse.....	3.7	3.2	2.6	2.3	2.0	2.0	2.0	1.5
Albany.....	2.0	2.1	2.4	2.4	2.4	2.2	2.1	1.3
Troy-Lansingburg.....	1.3	1.3	1.5	1.6	1.2	1.3	1.3	1.0
Utica.....	1.3	1.4	1.4	1.3	1.2	1.1	1.1	0.8
Schenectady.....	0.6	0.9	0.9	0.9	2.7	2.5	1.6	0.4
Total (eight cities).	<u>90.0</u>	<u>88.2</u>	<u>86.3</u>	<u>84.6</u>	<u>81.2</u>	<u>82.4</u>	<u>84.8</u>	<u>59.5</u>

Comparison with the figures of previous years shows that the proportion of unionists contributed by the eight cities was larger in 1904 than in 1901, 1902 or 1903. Until last year, indeed, the proportion in these cities had been steadily declining, indicating the spread of unionism to the villages and smaller cities. New York City, the original stronghold of organized labor, maintained a steady growth, but saw itself outstripped by the remainder of the State, so that its proportion of the aggregate membership fell from 73.3 per cent in 1898 to 60.2 per cent in 1902. In 1903 the metropolis made a slight gain upon the remainder of the State, and in 1904 its proportion increased to a higher figure than in any year since 1899. The outside district, in fact, suffered an actual decline in numbers, while the metropolis recorded an increase, as shown in the following table:

TABLE 3.

YEAR ENDED SEPTEMBER 30:	ORGANIZATIONS.		MEMBERSHIP.		INCREASE IN MEMBERSHIP IN—		
	New York City.	All other towns.	New York City.	Other places.	New York City.	Remainder of the State.	The State.
1898.....	440	647	125,429	45,638	.....	.....	.....
1899.....	477	843	141,687	67,333	16,258	21,695	37,953

1901.....	515	1,356	174,022	102,119	19,548	11,242	30,760
1902.....	579	1,650	198,055	131,046	24,033	28,927	52,960
1903.....	653	1,930	244,212	151,386	46,157	20,340	66,497
1904.....	<u>670</u>	<u>1,834</u>	<u>254,719</u>	<u>136,957</u>	<u>10,507</u>	<u>*14,429</u>	<u>*3,922</u>

\*Decrease.

But for the addition of the laborers' union previously mentioned, New York City would barely have held its own last year; but the remainder of the State sustained a loss of 14,429, and now has an aggregate membership but slightly greater than that of 1902. The cities that suffered the principal losses may be noted in Table 4.

At the end of September, 1904, there were 27 cities or villages, each of which had upwards of 1,000 unionists, as compared with 29 in 1903, 26 in 1902 and 23 in 1901. Three cities in last year's list—Jamestown, Dunkirk and Amsterdam—lost heavily, and now have fewer than 1,000 unionists; while one city—Olean—gained sufficiently to bring it into this group. The other cities in the group that made gains in 1904 were New York, Buffalo (817), Newburgh (440), Binghamton (176), Troy (131), Syracuse (103), the Tonawandas (45) and Hornellsville (34). All the other large places lost ground, the heaviest losses having been in Schenectady, Gloversville-Johnstown, Rochester, Niagara Falls, Albany and Glens Falls. In the last-mentioned village the union membership has declined from 2,800 in 1902 to 1,136 in 1904.

In the aggregate the 27 places enumerated in table 4 sustained a net loss of 19 unions (1,818 in 1904 as against 1,837 in 1903) and gained 2,418 members (362,540 against 360,122)—the gain as already explained having been due almost entirely to the addition of one large union in New York City.

The number of separate localities that had at least one labor union in September, 1904 (Summary Table C, pages 5-9 of the Appendix) was 185 or 7 more than in the preceding year;\* showing that the movement has become more comprehensive, notwithstanding the losses in some localities.

A recapitulation of the county totals appears on the opposite page. New York county (co-terminous with the Boroughs of Manhattan and the Bronx, New York City) of course leads, and Kings county (Brooklyn Borough) is second, closely followed by Erie county. One more county, Monroe, has upwards of 10,000 unionists, and 6 additional counties have between 5,000 and 10,000 members of labor organizations, namely, Albany, Onondaga, Schenectady, Orange, Rensselaer and Westchester. Oneida, Niagara, Queens, Steuben, Saratoga, Chemung and Broome have between 2,000 and 5,000. Thirteen counties have been 1,000 and 2,000 union members; 11, between 500 and 1,000; 10, from 100 to 500; 5 under 100 and 4 (Hamilton, Lewis, Schoharie and Schuyler) no unions at all.

Only 19 of the 61 counties made gains in membership in 1904, and the gains outside of New York City were small. The largest (424) was in Cattaraugus county; while its actual gain was not of large dimensions, it was proportionately an unusual increase, amounting to about 35 per cent. In 5 other counties—Broome, Erie, Kings, Orange and Orleans—it approximated 200, but in the remaining 12 counties it was under 150. The largest losses were in Schenectady (3,780), Fulton (2,276), Chautauqua, Monroe, Herkimer and Westchester counties (over 800 in each).

---

\* The number of cities and villages represented by at least one labor organization was as follows:

## INDUSTRIES AND TRADES.

The summary in table 6 below shows that the decline in the number and membership of labor organizations in 1904 was on the one hand not confined to any one industry or group of trades, nor on the other was it common to all but rather a net product

of gains or losses in different industries or groups. Thus there were gains in number of unions between September, 1903, and September, 1904, in 7 groups of trades and losses in 5 with no change in one, while as respects membership 6 groups gained and 7 lost. Similar variation of gain or loss between industries or trade groups appears also if the changes in either half of the year alone be considered.

TABLE 6.—INCREASE OR DECREASE OF UNIONS AND MEMBERS IN 1904, BY INDUSTRIES.

Foremost in losses during the year are the metal trades, with a loss of 37 unions and 11,259 members, which are the largest changes in either item in any group. Then follows the miscellaneous group with a decline of 35 organizations and 6,169 members. The remaining losses in number of unions were in restaurants and retail trade (23), clothing and textiles (13) and food and liquors (10). In loss of members, however, clothing and textiles was third, with a decline of 4,891, closely followed by the wood

\*These figures differ from those in the annual report for 1903 by reason of the transfer of marine cooks and stewards from group 7 to group 2, to correspond with the 1904 classification.

working and furniture trades, which, in spite of a gain of two unions, lost 4,125 members. The only other notable decline in membership was in restaurants and retail trades, which contributed, however, a much smaller loss (1,219) to the total for the State than any of the above. All of the above groups of trades are conspicuous not only on account of the amount of their losses, but also because in every instance they suffered declines of the kind noted in both halves of the year.

The 7 groups of trades which gained in number of organizations made comparatively small gains of 6 in public employment, 4 in theaters and music and but 2 each in the others except in the transportation trades, which made a conspicuous gain of 21 organizations. In membership gains, however, both building and transportation far surpass the other groups, the former with an increase of 9,431, the latter with a gain of 8,810. The other gains were by the theatrical and musical trades (1,940), stationary engine men (1,536), the printing trades (1,433) and, notwithstanding the loss of 10 unions, food and liquors (887). The gain of 6 organizations by the public service trades did not prevent a slight decline in their membership for the year. The tobacco trades remained practically stationary, both as to unions and membership. The gains in membership in transportation, theaters and music, stationary engine tending and the printing trades were made up of increases in both halves of the year, but in the building trades the advance was a product of a gain in the first half of the year partly counterbalanced by a loss after March.

In the following pages the year's changes in each group of trades are analyzed.

#### 1. BUILDING, STONE WORKING, ETC.

With scarcely any change in number of organizations there was a gain of 9,431, or 8.5 per cent, in the total membership of the unions in this group. This gain was the result of a large increase among the unskilled building and street laborers, the skilled trades of the group (with a decrease of 2,046 in the building and paving trades and a gain of but 878 in stone working) showing a decline for the year, thus:

	UNIONS.			MEMBERSHIP.		
	1903.	1904.	Change.	1903.	1904.	Change.
Stone working.....	45	44	-1	6,706	7,584	+878
Brick and cement making.....	8	7	-1	369	371	+2
Building and paving trades.....	569	575	+6	80,630	78,584	-2,046
Building and street labor.....	57	55	-2	22,752	33,349	+10,597
Total.....	679	681	+2	110,457	119,888	+9,431

Further analysis shows that the gain among the laborers was practically all localized in New York City in an increase of 10,000 in a single organization of excavators in Manhattan Borough, and a gain of 1,056 in the Brooklyn building laborers' union. No other notable gain in membership by the unions of laborers was made except in Rochester, where there was an increase of 220 in four unions. Off-setting these increases to only small extent were but two considerable losses among the building and street laborers, namely, decreases of 200 in a rockmen's union and of 535 in two cement and asphalt workers' organizations, all in New York City.

The increase of 838 members in the stone working trades was chiefly the result of a gain of 934 among the marble cutters and workers' unions of New York City. There was an addition also of 211 paving block cutters in three new unions in Orleans county. The chief losses which cut down this gross gain of over 1,100 were 122 granite cutters due to the lapsing of a Peekskill union, 123 quarrymen owing to a large falling off in the membership of an Albion (Orleans county) union and a decrease of 100 in a machine stone workers and hand rubbers' union of New York City.

The decrease of 2,046 members in the building and paving trades, which constitute the chief division of Group 1, was the net product of losses in 26 trades and gains in 15. Such changes, however, were of less than 100 members in all but 13 trades. The changes in the case of the latter, constituting the chief gains or losses of the sub-division, may be summarized thus:

TRADE.	Total gain or loss.	Location of principal gains or losses.
<i>A. Losses.</i>		
Housesmiths and bridgemen.....	— 1,112	New York City..... — 1,026 (Manhattan)
Painters and decorators.....	— 817	New York City..... — 430 (Manhattan — 952, Brooklyn + 443)
		Rochester..... — 120
		Schenectady..... — 105
Plumbers and gasfitters.....	— 794	New York City..... — 596 (Manhattan and Bronx — 506, Brooklyn — 100)
Carpenters and joiners.....	— 676	New York City..... + 393 (Brooklyn + 321)
		Buffalo..... — 262
		Schenectady..... — 219
		Albany..... — 139
Building material handlers.....	— 490	New York City..... — 490 (Manhattan)
Electrical workers.....	— 462	New York City..... — 470 (Manhattan — 400)
Steam pipe and boiler felters.....	— 423	New York City..... — 425 (Manhattan)
Caisson and foundation workers.....	— 250	New York City..... — 250 (Manhattan)
Plasterers.....	— 132	New York City..... — 112 (Brooklyn — 135)

TRADE.	Total gain or loss.	Location of principal (+ 100) gains or losses.
<i>B. Gains.</i>		
Bricklayers and masons.....	+1,544	New York City..... +1,832 (Manhattan +1,600, Brooklyn + 200) Buffalo..... — 180
Roofers and sheet-metal workers.....	+ 717	New York City..... + 825 (Manhattan + 820)
Lathers.....	+ 385	New York City..... + 399 (Manhattan and Bronx + 330)
Steam fitters' helpers.....	+ 360	New York City..... + 400 (Manhattan)

In three only of the building and paving trades was there a gain or loss of more than one organization. The painters gained five unions, chiefly as the result of seven new organizations in New York City, although, as above indicated, the membership of the trade declined both in the State as a whole and in the metropolis. The carpenters gained four unions, all but one outside of New York City, and in this trade also the new unions did not add to the total membership of the trade sufficiently to prevent a decrease of members for the year. There was a net loss of two in the total of bricklayers and masons' unions outside of New York City, but this was among the smaller unions and had but little effect on the membership of the trade, in which the largest gain of any among the building and paving trades was recorded. Of the other trades ten lost one union each and nine gained one.

## 2. TRANSPORTATION.

The gain of 21 organizations in Group 2 was confined almost wholly to the railway and telegraph trades, but the increase of 8,810, or 14 per cent in the membership, was quite evenly divided between railways and telegraphs, navigation, and trucking, cab driving, etc., as shown by the following summary:

	UNIONS.			MEMBERSHIP.		
	1903.	1904.	Increase.	1903.	1904.	Increase.
Railways and telegraphs.....	210	239	29	27,778	30,830	3,052
Navigation.....	18	22	4	16,186	19,871	3,685
Trucking, cab driving, etc.....	78	65	*13	11,999	15,058	3,059
Freight handling.....	45	46	1	7,086	6,100	*986
Total.....	351	372	21	63,049	71,859	8,810

The bulk of the gain in number of unions in railways and telegraphs, and hence in the group, was due to a rapid extension of organization among railway clerks, which added 20 new unions during the year to the 4 reported in September, 1903. This caused an increase of 1,036 members in that trade, the largest increase recorded by any trade in the sub-division. Included in the gain

\* Decrease.

among the clerks were 3 unions and 133 members in New York City, 2 unions and 253 members in Buffalo, 1 union and 120 members in Niagara Falls and 1 union and from 12 to 83 members each in 15 other localities, scattered through the State. Of gains in membership the next largest after that among the railway clerks was one of 853 by the trainmen, 213 of which was in New York City, but most of which was made up of small increases in numerous localities and chiefly in old organizations, since there was a gain of only 3 new unions (no lapses of old organizations) during the year. Other noteworthy increases in membership among the railway and telegraph trades were one of 587 by the switchmen, practically all (573) in 5 new Buffalo unions; 570 by the elevated railroad employees' organization in Manhattan Borough of New York City; 474 by commercial telegraphers, nearly all (441) in a metropolitan union; and 288 by railroad telegraphers, made up of small gains in various localities. The locomotive engineers, railway conductors and locomotive firemen complete the list of increases in membership in the sub-division of railways and telegraphs with small gains of 183, 153 and 104 respectively. Offsetting the above gains was but one notable decrease in the sub-division, viz: a decline of 963 in the number of organized car builders, repairers, inspectors, etc., due chiefly to a large decrease of 575 in 2 Buffalo unions and one of 226 in New York City. There were two other decreases, one of 20 members in the minor trade of car and locomotive painters, while the trackmen, who have never been extensively organized in this State, lost 2 unions and 44 members, leaving but one organization with 60 members in the State at present.

The increase of 4 unions and 3,685 members in the trades connected with navigation was the product of two new masters and pilots' organizations, one in New York City with 2,054 members, the other in Buffalo with 400 members; of a new marine cooks and stewards' union in Ogdensburg and a new boatmen's union in Whitehall; and of an increase of 2,509 union members among the marine cooks and stewards, 1,550 in Buffalo and 930 in New York City, about one-fourth of these membership gains being offset by losses of 503 by the boatmen's unions (there was a gain in Haverstraw of 376, but a loss in New York City of 869), 395 by the marine engineers (400 in the metropolis), 245 by the seamen (337 in Whitehall and 100 in Buffalo against a gain of 200 in Ogdensburg), and 135 by the marine firemen (100 in New York City).

In the trucking and livery trades there was a loss of 13 unions, 6 of which were in the principal trade of team drivers divided among several localities outside the metropolis, with losses of 2 each by the coal handlers and ice handlers, and 1 each by ashmen, automobile drivers (resulting in those trades dropping out of the ranks of organized labor in this State), and cabmen. Notwithstanding the decrease in number of organizations, however, the membership of the unions in the trades of trucking, cab driving, etc., increased during the year by 3,059, practically all due to a notable spread of organization among the team drivers and cab drivers of Manhattan Borough in New York City, where there was an increase of 3,629 members in those trades. In other localities, however, there were not a few decreases in membership among the team drivers (the largest of which were 101 and 104 in Albany and Rochester respectively), which with comparatively small net losses in three other trades (ashmen, automobile drivers and ice handlers) served to bring down the net increase for the sub-division.

The decline of 986 in the membership of unions in the trades connected with freight handling was made up of losses in five of the eight trades represented a year ago. The longshoremen's unions lost 366 members, caused by a decline of 409 in New York, Manhattan Borough; lumber handlers' unions lost 265 members (176 in Ogdensburg); the freight and baggagemen, though having two more unions than a year ago, nevertheless show a net loss of 260 members, due chiefly to a loss of 300 in Buffalo; the ore handlers' organization in Buffalo lost 140 members, and the lapsing of a trestle car handlers' union in the same city took that trade from the roll of organized trades in this State and added 84 more to the losses among the freight handling trades, none of which made gains of any account save the grain shovelers, who gained 107 members all in the one Buffalo union, which alone represents that trade in organized labor in this State at the present time.

### 3. CLOTHING AND TEXTILES.

The group of trades connected with the making of clothing and textiles lost as a whole 13 unions and 4,891, or nearly 12 per cent, in union membership. Over one-half of the loss in membership was in the garment-making trades, which constitute far the largest of the five sub-divisions of the group. Proportionately to their membership, however, the lesser sub-divisions made up respectively of the shoe and glove making trades, the shirt, collar

and laundry trades and the textile trades, lost even more heavily as to membership and contributed the entire loss of unions for the group. The hat, cap and fur workers maintained their membership of a year ago.

	UNIONS.			MEMBERSHIP.		
	1903.	1904.	Decrease.	1903.	1904.	Decrease.
Garments.....	85	88	*3	28,792	26,079	2,713
Hats, caps and furs.....	17	20	*3	3,818	3,899	*81
Boots, shoes, gloves, etc.....	38	33	5	5,105	4,133	972
Shirts, collars and laundry.....	16	11	5	1,575	732	843
Textiles.....	25	16	9	1,691	1,247	444
Total.....	181	168	13	40,981	36,090	4,891

Of the score of separate garment-making trades listed a year ago in the roll of organized trades, 12 lost ground as to union membership during the last year, while 7 gained and 1 did not change, and 1 new trade was added to the list. Several of the above changes in membership were unimportant, but in the majority of cases they amounted to 100 or more members, and included losses of 971 by cloak makers, 868 by pressers, 714 by jacket makers, 519 by overall workers, 507 by pants makers, 384 by skirt makers, 220 by waist makers, 126 by coat makers and 100 by knee pants makers, these losses being only partially offset by gains of 764 by clothing cutters, 349 by tailors, 300 by the newly organized boys' sailor-suit makers, and 270 by vest makers. New York City, the great garment-making center of the country, naturally claims the bulk of the union membership in those trades, and fluctuations there account for practically all of the above noted changes save the loss and gain respectively by the overall workers and the tailors, which were in Buffalo.

The loss in number of unions and in membership among the trades classified under boots, shoes, gloves, etc., was practically all due to the losses among the glove cutters and makers of Fulton county following the total defeat of the cutters in their strike against the open shop, as described in this year's report of the Bureau of Mediation and Arbitration (pp. 115-118), those losses having aggregated five unions and 937 members.

In the trades connected with the shirt, collar and laundry industries there was a loss of 5 unions and 843 members. The laundry workers lost 5 unions in as many different localities up-State and 312 members, the lapsing of a Glens Falls union with 200 members accounting for much of the latter; the shirt cutters gained 1 organization, but lost 378 members, both in

\*Increase.

New York City; and the shirt, waist and collar makers lost one union and 153 members, due chiefly to the lapsing of a Glens Falls local with 125 members. The losses in membership in this sub-group, it will be seen, were for the most part in Glens Falls or New York City.

The textile trades in this State lost ground in labor organization during the year to the extent of one-third of their unions and one-quarter of their union members. Of the 11 distinct trades in which there were organizations at the end of this year 2 only increased in number of unions or membership during the year, namely, the silk ribbon weavers, who gained 2 unions and 218 members (one union with 248 members in New York City), and knitters who made a net gain of 95 members, all in New York City. It is noticeable that these two are the only textile trades with organizations in the metropolis, and that their gains were almost wholly there. On the other hand, in five other localities there were lapses of 11 unions in 7 different trades. Most conspicuous among these is Jamestown, in whose important textile industries there were 7 organizations with 195 members last year, while now there are but 2 unions with 60 members. In Amsterdam 2 of the larger unions in the textile trades lapsed this year, 1 with 110 jack spinners (which trade lost in all 191 members this year) and 1 rug weavers' union, which reduced the Amsterdam membership by 127 more. The largest single union of textile workers last year was a loopers' organization in Cohoes with 150 members, and that also lapsed this year. Conspicuous among the losses this year also was the lapsing of all 3 of the cloth weavers' unions (in Jamestown, Fulton and Oswego with a total membership of 134) which were in existence in 1903.

#### 4. METALS, MACHINERY AND SHIPBUILDING.

As already noted this group of trades leads all the others in extent of decreases either in number of unions or total membership. All three sub-divisions of the group shared in the decline, thus:

	UNIONS.			MEMBERSHIP.		
	1903.	1904.	Decrease.	1903.	1904.	Decrease.
Iron and steel.....	289	264	25	39,180	30,529	8,651
Other metals.....	54	43	11	6,359	4,151	2,208
Shipbuilding.....	17	16	1	2,691	2,291	400
Total.....	<u>360</u>	<u>323</u>	<u>37</u>	<u>48,230</u>	<u>36,971</u>	<u>11,259</u>

Further analysis shows that among the 36 iron and steel working trades there were three with conspicuous losses in number

of organizations, namely, the machine-shop workers, whose rapid organization during the last preceding year or two has now been followed by a sudden slump resulting in the lapsing of 12 unions (2 in New York City) this year, the blacksmiths who lost 6 unions in as many localities up-State, and the electrical apparatus makers in Schenectady who, after maintaining during 1903 the extensive organization effected in 1902, lost 6 unions in a reaction this year. Outside of these three trades, however, gains or losses in number of unions, though by no means few (9 gains and 10 losses), were small (varying from one to three only) and so nearly balanced each other as to leave only a net loss of one union for the 19 trades. Analysis as to membership changes shows that no less than 27 of the 33 iron and steel trades declined in union membership this year, and that of the 6 (all minor trades of the sub-group) which made gains in none was there a large increase, and in 3 only did the increase amount to 100 members, namely, the rolling mill and steel works employees, who gained 335 by the organization of 2 new unions in Cohoes and Troy, the wire workers and bed spring makers with an increase of 179, nearly all in New York City, and iron molders and core makers' apprentices who gained 130 through a new Buffalo union. But while losses in membership predominated among the iron and steel trades many of these were absolutely or relatively small. Thus 12 amounted to less than 100 members and 8 others (blacksmiths 319, blast furnacemen 300, steel cabinet makers 241, boiler makers 178, valve makers 150, bolt and screw makers 143, blacksmiths' helpers 132, and metal painters 116) to from 100 to 300. The bulk of the decline of 8,651 members in the sub-group of iron and steel, therefore, was the result of larger losses in 7 trades and these were: 2,258 by the machine shop workers (560 in Ilion, 415 in New York City, 320 in Schenectady, 240 in Poughkeepsie and 115 in Dunkirk), 1,208 by machinists (450 in Rochester, 183 in Schenectady and 105 in Yonkers), 1,159 by iron molders and core makers (739 in Buffalo and 140 in Schenectady), 1,070 by electrical apparatus makers (1,036 in Schenectady), 846 by architectural iron workers (715 in New York City), 512 by foundry laborers (200 in Schenectady and 121 in New York City), and 396 by the horseshoers (385 in New York City).

The decrease in number of unions and members among the trades working in metals other than iron and steel was chiefly the result of the loss of 8 unions and 606 members (2 unions and 209 members in New York City) by the metal polishers, buffers,

platers and brass workers together with conspicuous losses in membership of 569 by jewelers (519 in Buffalo), 399 by brass finishers (361 in Schenectady), 293 by chandelier filers and makers (in New York City) and 218 by watch case engravers and jointers (in New York City). Losses in membership in 7 other trades and gains in 4 in no case amounted to as many as 100 members, and several other changes in number of organizations caused no gain or loss in any trade of more than one or two unions.

In the shipbuilding trades one Buffalo union with 60 members lapsed, and most of the remainder of the decline in membership of 400 was due to a loss of 186 by the ship carpenters and calkers (161 in New York City) and 115 by the ship and machinery riggers' union in the metropolis.

#### MINOR GROUPS OF TRADES.

5. *Printing, binding, etc.*—There was an increase of 2 unions and 1,433 members in the printing and bookbinding trades. Changes in number of unions were relatively few and appear in but 6 out of the 18 trades and consisted of a net gain or loss of but one or two organizations, except in case of the lithographers, who gained 4 (3 in New York City). Likewise in respect of membership, although there was some change in every trade, the increases or decreases were all small and in only 4 trades amounted to over 100, and these were all gains, and together account for the bulk of the increase in membership for the group. These 4 were an increase of 688 among the lithographers (607 in New York City), 419 by compositors (290 in the metropolis), 218 by the pressmen (128 in New York City), and 213 by the bookbinders (again mainly in New York City). It will be seen that the greater part of the moderate growth in organization in this group during 1904 was in New York City.

6. *Wood working and furniture.*—Though the strength of organized labor in the wood-working and furniture-making trades, so far as indicated by the simple number of organizations, would appear to be practically the same at the end of this year as last, measured by the number of union members there was a heavy decrease of 4,125 or 24 per cent of the total number in September, 1903. Heavy losses in several trades contributed to this result. Foremost of these were the carriage and wagon makers, who lost 1,877 members chiefly as a result, no doubt, of the unsuccessful strike of the unions in New York City (where there was a decrease

of 1,818 members), which is described in the current report of the Board of Mediation and Arbitration (p. II.91). The Rochester union also lost 120 members as the result of a strike which failed and which is likewise recounted in the Arbitration Report (p. II.94). The other trades which lost heavily were the piano and organ workers (—772), smoking pipe-makers (—600), box makers and sawyers (—575), machine wood workers (—419), upholsterers (—259), reed and rattan workers (—176) and wood carvers (—120), and all or the chief part of each of these losses occurred in New York City, save in the case of the machine wood workers, whose decline was mainly up-State. Against these notable declines there were but two increases of as many as 100 members, namely, one of 440 by the broom and brush makers (406 in the metropolis) and 143 by the cabinet makers (all in New York City).

7. *Food and liquors.*—As between the trades connected with the preparation of food products and those concerned with the manufacture of beverages, the changes in number of unions and membership were as follows:

	UNIONS.			MEMBERSHIP.		
	1903.	1904.	Decrease.	1903.	1904.	Increase.
Food preparation.....	99	90	9	11,504	12,221	717
Beverages.....	57	56	1	6,442	6,612	170
Total.....	156	146	10	17,946	18,833	887

It will be seen that under beverages, where the brewery workmen represent practically the whole strength of organized labor, the situation as to extent of organization remains this year practically as it was a year ago.

The loss of 9 unions in food preparation was distributed among the bakers who lost 5 (4 in New York City), butchers and meat cutters, 3 (all in localities up-State), cooks, 2 (both in New York City), and natural food operatives, 1 (Niagara Falls), this total of 11 being reduced by a new union of egg inspectors in New York City and of milk bottlers and handlers in Middletown. The moderate gain in membership in the face of this decline in number of unions was the result of a large increase of 1,195 members among the cooks in New York City, together with an addition of 190 egg inspectors in the same city and 126 butchers and meat cutters, the last also a metropolitan gain as compared with the remainder of the State, against which increases should be noted a loss of 583 members by the bakers (again principally in New York City) and of 180 natural food operatives in the lapsed Niagara Falls union.

8. *Theaters and music.*—The organization of new unions of bill posters in Albany and Buffalo, and of stage mechanics in Geneva and Troy added 4 to the number of organizations in this group, the number of unions among the musicians, in which trade are 35 out of the 55 organizations in the group, remaining the same as one year ago. Two trades made conspicuous gains in membership, which explain the greater part of the increase of 1,940 in the group—the actors, who are organized in this State only in New York City—with an advance of 1,172, and the musicians with a gain of 495 (209 in the metropolis, 109 in Troy). There was an increase also of 141 in the number of organized stage mechanics (116 in New York City) and of 125 union bill posters.

9. *Tobacco.*—Outside of the loss of a tobacco workers' union in New York City with a consequent loss of 163 members in that trade and a gain of one in number of cigar makers' unions (up-State), there was no change in number of unions and none of any account in membership in the trades of this group, in which, as a whole, there was no change except a loss of 81 members in a total of over 12,000.

10. *Restaurants and retail trade.*—Nearly all the decrease of 23 unions and all the decline of 1,219 in membership in this group was in retail trades as revealed by the following comparison:

	UNIONS.			MEMBERSHIP.		
	1903.	1904.	Decrease.	1903.	1904.	Decrease.
Hotels and restaurants.....	59	55	4	6,249	6,603	*354
Retail trade.....	69	50	19	4,693	3,120	1,573
Total.....	128	105	23	10,942	9,723	1,219

The subdivision of hotels and restaurants is made up of the two allied trades of bartenders and waiters, the former of which lost 3, and the latter 1 union, all up-State. The net gain in membership for the two was the result of a gain of 512 among the waiters (350 in Rochester), with a loss of 158 by the bartenders (all outside of New York City). In retail trade the clerks and salesmen, who contribute a large majority of the unions and membership in the subdivision, lost heavily as to both items, with a falling off of 14 unions and 1,016 members, all but 2 of the former and 112 of the latter outside of New York City, and contributed to by numerous localities, notably, as to membership, by Gloversville with a loss of 125 and Rochester with a decrease of 115. Two of the lesser trades in the subdivision also fell away in considerable measure as to union strength, namely, the

milk peddlers with a decrease of 3 unions and 385 members (—200 in New York City), and newsboys and bootblacks with a loss of two unions and 106 members (up-State).

11. *Public employment.*—A gain of 6 unions and a decrease of 215 members was the net change for the year in extent of organization among the employees of public authorities. There was an increase of 7 in number of letter carriers' organizations in up-State localities, though without much affecting the total membership in that trade in the State, which now numbers 87 out of the 117 unions in this group. The net loss of members in the group was occasioned by a decline of 216 in 2 unions of city drivers and hostlers in Manhattan Borough of New York City.

12. *Stationary engine men.*—Two trades—engineers and firemen—make up this group at present. There were 3 more engineers' unions and 1 fewer firemen's unions in the State at the close of this year than last, making a gain of 2 for the group. Both trades gained largely in membership, however, the engineers by an increase of 440 members, due chiefly to a gain of 468 in New York City, and the firemen with an increase of 996 through a gain of 1,095 in the 1 metropolitan union.

13. *Miscellaneous.*—The decrease of one-sixth in number of organizations and of one-third in membership in the trades grouped under "miscellaneous" was distributed between the six different classes of trades therein distinguished as follows:

	UNIONS.			MEMBERSHIP.		
	1903.	1904.	Decrease.	1903.	1904.	Decrease.
Paper and paper goods.....	45	31	14	4,466	3,029	1,437
Leather and leather goods.....	21	18	3	3,068	1,730	1,338
Glass and glassware.....	26	25	1	2,529	1,688	841
Barbering.....	49	52	*3	2,439	2,491	*52
Other distinct trades.....	31	20	11	3,132	1,969	1,163
Mixed employment.....	26	17	9	2,360	918	1,442
Total.....	198	163	35	17,994	11,825	6,169

In the three trades connected with paper and paper goods making there were considerable declines both in unions and membership. Thus the paper bag and box makers lost 2 unions and 891 members, the paper makers 6 unions and 251 members, and the pulp workers 6 unions and 295 members, all of these losses being in localities outside of New York City except in the case of the bag and box makers, who lost 800 members in the metropolis. In the leather-making and leather-working trades there was little change in number of unions, but a large decline in number of members, chiefly as a result of a heavy falling off of 1,246

\*Increase.

among the leather dressers and finishers (1,011 in Fulton county, probably a further effect of the unsuccessful strike of the glove cutters alluded to in connection with group 3 above, and 185 in New York City), there being also a loss of 189 members in the tanners and curriers' unions (175 in Ballston), with no gain in any trade except the trunk and bag workers, whose total union membership increased by 138 as the result of a gain of 200 in New York City. The net decline of 841 in the membership of glass workers' unions was principally the result of a decrease of 534 members among the bevelers and polishers (524 in New York City) and of 243 in a glaziers' union of the metropolis. Among the 21 "other distinct trades," which are very diverse in character though in no case properly classifiable elsewhere, there was a loss of one union in each of nine and a loss of two unions in one (gas workers), and membership decreases in all but 3 (2 of the latter were insignificant and the other was a gain of 125 members by a New York City union of wool pullers), there being decreases of 100 or more members in the following trades: Clip sorters (340 in New York City), gas workers (203; 175 in New York City), fishermen and oystermen (164 in Lake Erie and Long Island unions), porcelain workers (162 in Schenectady), bleaching powder workers (115 in Niagara Falls) and button makers (105 in three different localities). In "mixed employment," where are classified the unions composed of members from various trades, there were lapses of single unions in a number of localities and numerous losses in membership either through such lapses or through falling off in the membership of still-existing unions, the leading ones being 285 in Gouverneur, 275 in Oswego, 236 in Bath, and 102 in Utica. It is always true that to some extent decreases in the membership of unions of mixed trades represents only a transfer of membership from such organizations to the various "trade" unions, but an examination of the larger decreases in the four localities above noted would indicate that the bulk of the decline in "mixed employment" this year represented a real decrease in the union membership in the State.

#### THE LEADING TRADES.

In table 7 below is shown the growth of organization during 1904 and during the decade since 1894 in each of the trades which at the close of this year had 2,000 or more union members. No less than seven trades which had place in a similar list for last year have now dropped below the 2,000 mark, these being, in order according to the amount of their decrease in union membership

this year, the carriage and wagon workers, electrical apparatus makers, machine-shop workers, "mixed employment," clothing pressers, architectural iron workers (shopmen), and cement and asphalt laborers. On the other hand, four trades by virtue of growth in membership sufficient to carry them above that limit have come into the list this year, viz: the marine cooks and stewards, masters and pilots, cabmen and coach drivers, and cabinet makers.

TABLE 7.—NUMBER AND MEMBERSHIP OF UNIONS IN THE PRINCIPAL TRADES, 1894, 1903 AND 1904.

Dock builders.....	1	1	1	74	2,000	2,000

ORGANIZED WORKING WOMEN.

The number of women in labor organizations in the State decreased during 1904 by 1,936, so that again this year as last the proportion of organized women to men declined and the percentage is now lower than in any previous year, thus:

1894.	1895.	1897.	1898.	1899.	1900.	1901.	1902.	1903.	1904.
4.8	5.6	3.4	4.4	4.0	4.8	5.3	4.7	3.7	3.3

Of the 12,817 female members of labor unions, one-half (6,516) are workers in the clothing trades, including the shoe and the glove workers as well as the garment workers. Nearly one-fourth are cigar or cigarette makers, while fairly large contingents are found in the theatrical profession and the typographical trades (book-binding almost exclusively), and the remainder are scattered through other trades, as shown in the following table:

TABLE 8.—NUMBER OF WOMEN IN LABOR UNIONS IN EACH INDUSTRY.

## II.

### THE STATE OF EMPLOYMENT.

A continuous record of the fluctuations in the labor market is maintained by the Bureau on the basis of monthly reports from secretaries of some 200 organizations of workmen, representing 85 different trades and occupations in the principal industrial centers of the State. The number of workmen included in these monthly reports approximates 100,000, or substantially one-fourth of all the members of trade unions in the State. Summaries of the statistics are regularly published in the Department's Quarterly Bulletin in March and September, and the principal figures for 1904 are reproduced in Tables D to H (pages 10-19) of the Appendix. It appears that the number of unions reporting in 1904 fluctuated between 176 in July and 199 in October, November and December, while the number of wage workers reported on varied between 95,501 in April and 104,074 in February. While most of the organizations reporting are the same ones each month, some changes are necessitated by the occasional dissolution of a union, whose place can not always be filled by a union of the same trade. In making substitutions the aim is to maintain a fair representation of each industrial group of workmen. Comparing December with January, it will be observed that there is an increase in the number of workers reporting in the transport trades and a corresponding decrease in the building, clothing and printing trades, while the number in the metal and machine trades remained about the same (Table D, page 11 of the Appendix).

The following table brings the figures for 1904 into comparison with those of 1902 and 1903:

TABLE 1.—NUMBER AND PERCENTAGE OF UNEMPLOYED MEMBERS OF REPRESENTATIVE TRADE UNIONS.

END OF—	Number of unions.	Number wage workers con- sidered.	Number thereof idle.	Per cent idle.	Idle on account of labor disputes.	PER CENT IDLE.	
						1903.	1902.
January.....	184	100,602	26,004	25.8	2,541	20.5	20.9
February.....	182	104,074	22,460	21.6	1,559	17.8	18.7
March.....	181	103,681	28,124	27.1	6,820	17.6	17.3
April.....	182	95,501	16,198	17.0	2,963	17.3	15.3
May.....	182	96,187	15,262	15.9	3,712	20.2	14.0
June.....	180	96,476	13,263	13.7	1,647	23.1	14.5
July.....	176	96,824	14,317	14.8	4,982	17.8	15.6
August.....	189	96,772	13,231	13.7	4,824	15.4	7.1

December.....	199	96,075	18,847	19.6	2,760	23.1	22.2
Average.....				16.9		17.5	14.8

It appears that the state of employment was much less favorable throughout 1904 than in 1902. Compared with 1903, the conditions last year do not indeed appear so bad; but this is due to the exceptional amount of idleness produced in the summer of 1903 by the extensive disputes in the building industry of New York County. Were the building trades excluded, we should find that the percentage of unemployed members of workmen's unions last year exceeded that of a year ago for each of the first nine months (August excepted).<sup>\*</sup> Only in the last three months of the year was the relative amount of idleness smaller in 1904 than in 1903. The depression that began in the autumn of 1903 lasted, therefore, just about a year.

It is true that other causes than slack trade and labor disputes enter into the idleness chronicled in these statistics; but it is quite impossible to separate the personal from the social or industrial factors. Where a trade union pays an unemployed benefit, as is commonly done by the English unions, the financial officers of the union are obliged to determine whether the want of employment is actually due to industrial causes (inability of competent and willing wage earners to find work) or to the indisposition, carelessness or disability of the workman. Such a test is made in very few workmen's organizations in this country and the only practicable method of securing statistics of disemployment is to call for the number of wage earners idle for any reason whatsoever, with the apparent cause of idleness, and from these facts deduce the number idle by reason of slack work. For certain months of 1904 the causes of idleness were reported as follows:

TABLE 2.—CAUSES OF IDLENESS AT THE END OF—

The table illustrates the foregoing statement about the impracticability of distinguishing want of employment due to dull trade from other causes of idleness. The number idle on account of personal disability rises and falls with the number idle from lack of work or dull trade, which, without doubt, has a causal relation with the disability statistics. It is likewise difficult, if not impossible, at times, to say whether idleness is due to lack of employment or unfavorable weather conditions. If building is active, for example, work will be hurried even in bad weather; but if trade is dull, work will not be started under unfavorable conditions. It frequently happens that in the same locality idleness on the part of carpenters will be attributed to the weather and idleness on the part of lathers or painters to slack work. The number reported idle on account of lack of material is usually too small to have any bearing on the question of disemployment. The effect of labor disputes in the various industrial groups is partially revealed in the following figures:

TABLE 3.—MEMBERS OF REPRESENTATIVE TRADE UNIONS IDLE ON ACCOUNT OF LABOR DISPUTES.

Table 4 reveals the monthly fluctuations in employment in 1904 in each industry or group of trades and also brings the mean percentage of unemployment in 1904 into comparison with 1903 and 1902. Higher ratios prevailed in 1904 in 7 of the 13 industrial groups; in 3 of the remaining groups, the 1904 ratios were

above those of only one of the two preceding years and in the remaining 3 (printing, steam-engineers and miscellaneous) the 1904 ratios of idleness were below those of both 1902 and 1903.

#### UNEMPLOYMENT IN PREVIOUS YEARS.

While the monthly returns from representative unions are sufficient to indicate the unfavorable state of the labor market in 1904 as compared with 1902 and 1903, they do not permit comparison with earlier years, when these statistics were not collected. Beginning in 1897, however, the Bureau has statistics compiled from quarterly reports of all trade unions in the State. These reports furnish the following figures respecting idleness in the last decade:

\*Included in Group IV.

TABLE 5.—NUMBER AND PROPORTION OF UNEMPLOYED WAGE WORKERS, 1894-1903.

YEAR.	NUMBER IDLE AT END OF—				PERCENTAGE IDLE OF ALL WORKERS CONSIDERED.					Mar. and Sept.
	Mar.	June.	Sept.	Dec.	Mar.	June.	Sept.	Dec.	Average.	
1894.....	.....	34,811	.....	.....	.....	24.4	.....	.....	24.4	.....
1895.....	.....	32,237	.....	.....	.....	19.6	.....	.....	19.6	.....
1897.....	43,654	27,378	23,230	39,353	30.6	18.1	13.8	22.6	21.3	22.2
1898.....	37,857	35,643	22,485	46,603	21.0	20.7	13.1	26.7	20.4	17.05
1899.....	31,751	20,141	9,590	41,698	18.3	10.9	4.7	19.4	13.3	11.5
1900.....	44,336	49,399	31,460	49,110	20.0	20.6	13.3	22.0	19.0	16.65
1901.....	42,244	29,336	18,617	.....	18.5	11.9	6.9	.....	12.4	12.7
1902.....	36,710	.....	18,381	.....	13.6	.....	5.7	.....	9.65	9.65
1903.....	41,941	.....	34,370	.....	12.1	.....	9.0	.....	10.55	10.55
1904.....	103,995	.....	37,380	.....	27.2	.....	9.7	.....	18.45	18.45

Taking the figures for the month of March, it appears that the percentage idle in 1904 was greater than in any year since 1897, but in September the 1904 percentage was not so large as in 1900. The average for two months, however, was higher than in any other year except 1897. Inasmuch as these ratios rest upon the figures reported for two days in the year (end of March and end of September), it would hardly be justifiable to regard them as representative of the entire year. Reference to the monthly ratios, in fact, shows the great liability of error in such a proceeding, thus:

YEAR.	MEAN PERCENTAGE OF UNEMPLOYED MEMBERS OF—		
	ALL UNIONS. (Mch.-Sept.)	REPRESENTATIVE UNIONS. (Mch.-Sept.) (12 mos.)	
1902.....	9.65	11.8	14.8
1903.....	10.55	13.5	17.5
1904.....	18.45	19.6	16.9

It will therefore be seen that the ratios for the two months which place the year 1904 in a very unfavorable light are not representative of the entire year. Fortunately, we are not compelled to rely upon these, but can refer to much more comprehensive data, which sets forth the duration of employment of organized wage workers in two entire quarters of the year—January to March and July to September. As these six months contain both a winter and a summer season they fairly represent the entire twelve months, unless affected by some unusual and serious event that does not exert equal influence in the other months. Analyzing the tabulated results of the quarterly reports in the following table, we read that in the first quarter of 1904 the Bureau received reports concerning employment from 381,261 workingmen and women, of whom 55,708, or 14.6 per cent, did not work at all in the quarter. Of the remaining 325,553, who had some employment in that period, a very few (621) did not give

1902.....	324,168	6,291	1.9	317,877	307,206	71.09	313,497	24,139,269	21,840,479	91.0
1903.....	348,737	12,670	3.6	336,067	369,705	70.58	381,375	29,365,875	26,024,728	88.6
1904.....	385,712	9,175	2.4	376,537	371,268	69.52	380,443	29,294,111	25,811,091	88.1

sufficiently definite information to permit its tabulation; excluding them, the total number of days of employment in the quarter was 21,001,989, an average of 64.6 days per worker. Inasmuch, however, as there were 77 working days in the quarter, the employed workers lost about two weeks on the average. Had all of the 380,640 wage earners reporting (including both the idle and those who worked part time) been fully employed throughout the quarter (77 days) they would have accomplished 29,309,280 days' work (col. 9). The difference between the actual and possible aggregate, amounting to 8,307,291 days, measures the time lost by reason of all causes, personal and industrial; the ratio of actual to possible employment (71.7 per cent) being smaller than in any corresponding quarter since 1897. In the third quarter, however, the situation was much improved and the ratio of actual to possible employment was 88.1 per cent, as against 88.6 per cent in 1903 and 91 per cent in 1902. Combining the two quarters, we have the following averages for six months in each of the past eight years:

TABLE 7.—PERCENTAGES OF UNEMPLOYMENT IN THE FIRST AND THIRD QUARTERS DERIVED FROM TABLE 6.

YEAR.	Average percentage of members idle 3 months at a time. (col. 4.)	Average number of days worked in 3 months. (col. 7.)	Percentage of time lost (assuming 154 days).	Average percentage of time lost by both idle and employed wage workers. (col. 11.)
1897.....	15.65	124.87	18.9	30.3
1898.....	7.90	127.39	17.3	24.0
1899.....	7.70	135.69	11.9	18.0
1900.....	7.75	132.42	14.7	20.5
1901.....	7.20	136.51	11.3	17.2
1902.....	4.05	138.52	10.1	13.4
1903.....	4.45	138.45	10.1	14.0
1904.....	<u>8.50</u>	<u>134.48</u>	<u>12.7</u>	<u>20.1</u>

The first column indicates that the ratio of wage earners without work was larger in 1904 than in any year since 1897, while the second and third columns indicate that the duration of employment of wage earners at work was greater than that of 1900 as well as 1897 and 1898. The last column shows the percentage of working time lost by all wage earners reporting. The ratio for 1904 was almost identical with that of 1900—the most unfavorable year since 1898.

The causes of the unfavorable turn of the labor market in 1904 have already been indicated in the discussion of the monthly reports of representative unions, but some additional light is thrown on the matter by the next two tables. Table 8 reveals the unusually large number of workers idle in both March and

\* Included in Group 4.

September, by reason of lack of work and labor disputes, and table 9 exhibits the industries most affected by these causes.\* At the end of March there were 25,723 wage workers on strike or locked out and of these 19,324 belonged to the building trades, 2,240 to the typographical trades, 1,870 to the garment and glove and shipbuilding, engine tending and miscellaneous trades, etc. Substantially all of the building workmen involved were in New York City and were concerned, directly or indirectly, in the dispute concerning the overtime payment of bricklayers' laborers, in which 18,359 wage earners stopped work for an entire month (March 4 to April 6, losing 478,696 days' work). The dispute in the lithographic industry, lasting from March 17 to April 20, involved 2,118 workmen (loss of 63,540 days), all members of lithographers' or pressmen's unions. In Rochester, 265 union carriage and wagon workers were out from March 14 to May 20, losing 10,000 days; and there were smaller disputes, as noted in the current report of the Bureau of Mediation and Arbitration. In the second quarter of 1904 industrial operations were interrupted by even more far-reaching conflicts, including those of the garment workers, the asphalt laborers and other workers in New York City and the masters and pilots on the Great Lakes; but these had nearly all terminated before the end of September, when the only dispute figuring largely in the statistics of idle-

\*The following table shows that the unfavorable conditions of employment existed in all of the larger industrial centers of the State:

ness was the conflict in certain building trades of New York City, which is still unsettled.

Most of the idleness in September was due to slack trade, the curtailment of production caused by the financial stringency in the autumn of 1903 having gradually spread from the metal and machine-making industries to other trades, as revealed in tables 10, 11 and 13.

The record for 1904 might compare even more unfavorably with that of preceding years but for the changes in the composition of the organizations that make returns. The only important industries that increased their strength in the trade-union movement in 1904 were transportation and construction. The former group, which made the larger gain, contains two-thirds of the wage earners who work more than normal time (77 days a quar-

\*Included in Group 4, Metals and Machinery.

ter), owing to the fact that so many of them work seven days a week. This circumstance largely explains the increase in the group credited with overtime in the following table:

TABLE 14.—NUMBER AND PERCENTAGE OF ORGANIZED WAGE EARNERS WITHIN CERTAIN LIMITS OF EMPLOYMENT.

### III.

#### WAGES AND EARNINGS.

Table V of the Appendix sets forth at some length the rates of wages in the various organized trades. In some trades the rate provided in the union scale is a standard rate and may be so recognized in formal agreements\* between associations of employers and the unions, as is the case, for example, in all of the skilled building trades in New York and other cities. Where the union is able to secure such recognition for its scale, its rates are almost universally accepted throughout the locality. In other cases the union scale is accepted by a sufficient number of individual employers to make it the standard, while in still other instances the union scale may have been adopted by only a minority of the employers and yet stand as a fair expression of the "current," "going" or prevailing rate of wages. Some industries are still unorganized, even in the large cities. This is especially true in the case of industries partially carried on by female operatives. But so far as men's wages in trades requiring a moderate degree of skill are concerned, the unions' statistics of wage rates embrace the larger number of industries in manufacturing and transportation, with some representation in commerce and trade.

Closely approximating the daily wage rate are the per diem earnings, which alone permit the method of averages to be applied to large numbers of workers, as is done in Table V. The averages of men in the various industries or groups of trade in 1903 and 1904 were as follows (compare also summary Tables O and Q):

TABLE 1.—AVERAGE WAGES OF MEN, PER DIEM, IN ORGANIZED INDUSTRIES OR GROUPS OF TRADES.

INDUSTRY.	Jan.-Mch.		July-Sept.	
	1903.	1904.	1903.	1904.

XIII. Miscellaneous.....	2 11	2 12	1 93	2 06
All trades.....	2 74	2 72	2 69	2 80

\*A number of these trade agreements are printed in the current report of the Bureau of Mediation and Arbitration, and where the wage scale amounts to a long list of prices on piece work it must be looked for in the agreement rather than in the table of rates.

While theaters and music furnish the highest daily wage, that group is composed principally of musicians and actors, who follow a profession rather than a trade. With this exception, the highest rate is found in the structural industry, in which employment is very unsteady. As a building mechanic, when he does work, must obtain a wage sufficient to support him during the period when work is prevented by the severity of the weather, some of the wage rates in this branch of work are very high; New York City bricklayers, for example, earn 65 cents an hour, or \$5.20 a day when employed, but their average annual income, calculated from the average earnings in the first and third quarters of 1904, is only \$906, instead of the \$1,600 that might have been earned if they worked uninterruptedly.

In some cases there is noticeable a considerable variation in the two averages for the same year. No changes in rates of pay were made in the interval of sufficient importance to occasion such variations, and the explanation is therefore to be sought in changes in the composition of the groups. Thus in the transportation group the seamen and truckmen and other workers paid at a considerably lower rate than the railway men were more largely represented in one quarter than in the other, and therefore brought down the average for the group. For this reason general averages of any large group are not of great value, as they are subject to considerable fluctuations merely as a result of changes in the representation of different occupations. The apparent decline in the average of all trades from \$2.74 to \$2.69 a year ago was due not to reductions in the rate of wages (of which there were few if any in this period), but to the inclusion in the statistics of a larger number of low-paid workmen in one quarter than in the other. The increase in the average to \$2.80 in 1904 might also be due to similar circumstances; but before analyzing this change, it will be useful to consider the changes in wages reported by workmen through union secretaries and by employers through the factory inspectors.

#### CHANGES IN WAGES IN 1904.

Labor organizations reported changes in wages during the year ended September 30, 1904, affecting 20,284 of their members. Of these, 19,182 received increases and 1,102 had their wages reduced, while all the changes together were equivalent to an average net increase of \$1.38 per week per member. In addition to the union reports very incomplete returns from manufacturers show changes affecting 562 employees. These latter all received in-

creases which averaged \$1.28 per week per person. In the employers' returns are three small duplications of changes reported by unions, namely, changes affecting 7 Buffalo carriage and wagon workers, 9 Buffalo coopers and 26 Buffalo bakers, so that the two sets of returns together show for the year a net total of 20,804 workers affected by changes which were equivalent to an increase of \$1.38 per week for each worker.

In view of the incompleteness of this year's returns from manufacturers, comparison with previous years may best be made with the union returns alone and such a comparison follows:

TABLE 2.—CHANGES IN WAGES REPORTED BY TRADE UNIONS, BY YEARS.

YEAR.	INCREASES.		DECREASES.		NET CHANGES.		
	Members affected.	Average weekly increase.	Members affected.	Average weekly decrease.	Members affected.	Total weekly increase.	Average weekly increase.
1901.....	47,585	\$1.97	2,668	\$2.67	50,253	\$36,807	\$1.73
1902.....	93,225	1.78	3,329	.89	96,554	162,634	1.68
1903.....	65,182	1.81	394	.54	65,576	117,450	1.79
1904.....	19,182	1.59	1,102	2.30	20,284	28,060	1.38

It thus appears that less than one-third as many workmen received advances this year as last, that the average advance was lower, and that about three times as many suffered reductions which averaged much greater than those of last year. As compared with 1902, but a little over one-fifth as many received increases in 1904, which averaged lower also, and although but one-third as many suffered reductions, the latter averaged nearly three times as great as those in 1902. Comparing the total numbers affected by changes with the union membership in the State (which at the middle of each year was approximately 280,000 in 1902, 357,000 in 1903 and 400,000 in 1904), it appears that 34 per cent of the unionists in the State were affected by changes in 1902, 18 per cent in 1903, and 5 per cent in 1904.

In Tables VIII and IX of the Appendix the changes reported in 1904 are set forth in detail by industries, trades and localities. Summarized by industry or trade groups they were as follows:

TABLE 3.—CHANGES IN RATES OF WAGES, OCTOBER 1, 1903—SEPTEMBER 30, 1904.

The decreases were practically all in the first four groups of union trades of building, transportation, clothing and textiles, and the metal trades. Increases overbalanced decreases so as to show net increases for every group save clothing and textiles, where a net reduction of \$1.13 appears for the relatively few members affected. A combination of union and employers' returns, with duplications omitted, shows the following distribution by industries of the workers affected by the changes reported in 1904, together with the net increase for each industry:

TABLE 4.—DISTRIBUTION OF WAGE CHANGES, WITH NET CHANGES, BY INDUSTRIES.

INDUSTRY.	Number affected.	Total weekly increase.	Average weekly increase.
Building and stone working.....	8,220	\$13,135 10	\$1 60
Transportation.....	3,662	3,329 85	91

Clothing, millinery, laundry.....	441	414 50	94
Textiles.....	*385	*776 50	*2 02
Theatrical trades.....	319	881 70	2 76
Miscellaneous.....	261	85 05	13
Total.....	<u>20,804</u>	<u>\$28,734 82</u>	<u>\$1 38</u>

Nearly three-fifths of all the workers affected were in the building, transportation, and printing industries, of which the building industry stands far in the lead with over one-third of the total for the year. Following is further analysis of the changes in each of these three industries:

*Building and Stone Working.*—Of the 7,872 members of unions in this industry who received increases, over six-sevenths are accounted for by advances averaging \$1.34 per week for 2,867 carpenters (1,842 in Buffalo who received an advance of 20 cents per day, 300 in Utica and 175 in Port Chester with an advance of 25 cents per day in each case, and 550 in a dozen other localities all outside of New York City); by advances averaging 51 cents per week for 2,741 painters, decorators and varnishers (2,258 in New York City with advances of 25, 28 and 50 cents per day, 150 in Schenectady whose advance was 2 cents per hour or 16 cents per day, and 333 in seven other localities; and by advances of 25 cents per day for 780 New York City elevator constructors and millwrights, and 34 or 46 cents per day for 415 pavers and rammermen in New York City. Of the 348 unionists in the building trades who suffered a decrease of wages, 260 were Schenectady

\*Decrease.

carpenters, whose wages were cut  $2\frac{1}{2}$  cents per hour or 20 cents a day, and 51 were New York City varnishers, whose reduction was 75 cents per day. The decreases of the others were not caused by a cut in rates (the rate being actually increased in one instance), but by a shortening of the hours of work.

Comparing this year with last for the building trades as a whole, there were but a little over one-fourth as many union members (7,872 as compared with 29,332) benefited by increases this year, which averaged 39 cents less per week this year than last (\$1.75 as compared with \$2.14 in 1903). The number who sustained decreases was about the same, being small in both years (348 this year, 380 last), but the average decrease this year was \$1.74, mainly the result of direct cuts in wages, while the average decrease last year was but 54 cents, the result of reductions in hours accompanying actual advances in rates for practically all those affected.

*Transportation.*—In the official year 1903 a total of 17,132 union members in the transport trades received advances in wages which averaged \$1.71 per week, and no decreases in those trades were reported. In 1904 but one-fifth as many (3,462) received advances which averaged only \$1.16 per week and 200 suffered a reduction of \$3.50 per week each.

The distribution of this year's changes among the four subdivisions of the group, as compared with last year, was as follows:

	1904.		1903.	
	Number affected.	Average weekly increase.	Number affected.	Average weekly increase.
Railways and telegraphs.....	1,092	*\$1 42	9,003	\$1 32
Navigation.....	229	2 56	2,394	2 05
Trucking, cab driving, etc.....	2,280	1 04	5,107	2 25
Freight handling.....	61	3 50	628	1 55
Total.....	3,662	\$0 91	17,132	\$1 71

In trucking, cab-driving, etc., where nearly two-thirds of those who received advances this year are to be found, almost all are accounted for by advances of \$1 per week received by 2,050 team drivers in New York City and 100 cab drivers in Buffalo. In the railway trades the 892 who received advances were chiefly 635 elevated railroad employees in New York City, who received advances of 5, 10 and 15 cents per day, and 127 trainmen in Kingston and Niagara Falls. The 200 in the transport trades whose wages were reduced were railroad engineers in New York

\*Net increase.

City, who suffered a loss of \$3.50 per week. The 229 in navigation whose wages were advanced an average of \$2.56 per week were seamen (200) and marine cooks and stewards at Ogdensburg.

*Printing, Binding, etc.*—Last year the unions in the printing trades reported wage increases for 4,106 members, whose advance averaged \$1.16 per week. This year 2,503 members, or a little more than half as many as last year, received advances which averaged, however, \$1.80 per week or very much higher than last year's advances. No decreases were reported in either year. The chief constituents in this year's advances were increases of \$2 per week for 1,326 pressmen, \$2 per week for 300 newspaper and mail deliverers and \$3 per week for 139 photo-engravers, all in New York City; advances averaging 83 cents a week for 434 compositors (all outside of the metropolis and including 200 in Buffalo, 112 in Syracuse and 122 in six other localities, all but eight of these latter being in five towns of the lower Hudson River district); and advances of 25 and 50 cents per day for 145 check-book makers in Niagara Falls.

*Minor Industries.*—After the printing industry the largest number of workers affected by changes reported in 1904 was in public employment, whose total of 1,952 was composed mainly of 1,700 dock builders in New York City with advances of \$1.20 or \$3 per week; and of 159 hospital employees in Buffalo, Middletown and Willard, whose wages were advanced under the uniform schedule of salaries and wages for employees in the State hospitals for the insane established by chapter 714 of the Laws of 1904.

Of the other industries, in that of metals, machines and conveyances alone were changes reported affecting as many as 1,000 workers. Of the 1,102 workers affected by changes in this industry, one half (580) were carriage and wagon workers of New York City (472) and Buffalo (108) who received advances averaging \$2.80 per week. The other changes, affecting 404 who received advances and 118 who suffered reductions, were scattered both as to trade and locality and no one affected as many as 100 workers. Only one was in New York City, an advance of 20 cents per day for 75 boiler makers. Of the other increases, one of 25 cents per day affected 80 machinists in Lockport, while the remainder affected from 3 to 56 workers each (or a total of 254) in fifteen different localities scattered through the State. The decreases comprised 44 iron molders in Binghamton and Medina and 50 locomotive and car-pipe fitters in Buffalo, with

reduction of 25 cents per day in each case, and 24 rolling-mill employees in Lockport, whose piece rates were reduced from  $8\frac{1}{2}$  to  $15\frac{1}{2}$  per cent.

The 632 in the food and liquors industry who received wage advances in 1904 are nearly all accounted for by advances of 50 cents and \$1 per week in new agreements affecting 297 brewery workmen in Rochester,\* and of \$1 per week for 168 bakers of Buffalo and 150 egg inspectors in New York City. Advances of \$1 or \$2 per week for barbers in Buffalo (453), Rochester (126), Syracuse (50) and Niagara Falls (45) account for the 674 in that trade for whom changes were reported. In wood manufactures one-half of the 526 who enjoyed the advances reported this year were broom and brush makers in New York City (267) with a moderate advance averaging 25 cents per week. The others were principally 90 Troy machine wood workers with a 15 per cent advance, 53 Buffalo and Rochester coopers with advances of 50 cents or \$1 per week and 47 New York City carpet fitters and layers, who received a weekly increase of \$3. Practically all the changes in the clothing, millinery and laundry industry are comprised in an advance of 50 cents a week received by 250 members (165 women) of a wrapper makers' union in New York City, and various advances averaging \$1.54 per week reported for 179 employees (112 women) by six Buffalo firms manufacturing men's and boys' clothing.

The textile industry shows a net decrease for the relatively few changes reported in 1904, amounting to \$2.02 per week for the 385 workers affected. This was due to reductions of 5 per cent on piece rates for 200 New York City silk-ribbon weavers, who accepted this reduction in compromise settlement of a strike against a larger cut; of \$1.50 per week for 125 knitters in New York City, and of \$1 per week for 23 textile workers in Lockport. Four employers reported advances, but these were comparatively insignificant and affected all told but 37 employees.

Of the 319 in the theatrical trades who reported advances practically all (305) were in New York City, comprising actors and singers (175), stage mechanics (90) and bill posters (40), whose gains ranged from 50 cents to \$5.50 per week. Of changes in other industries mention may be made of an advance of 10 cents per day received by 90 iron miners of Mineville (Essex County) and a reduction in piece rates affecting 88 trunk makers in New York City.

---

\*For the new wage scales see text of agreements in current report of the Bureau of Mediation and Arbitration, pages 187-193; analysis in the Labor Bulletin of June, 1904.

QUARTERLY EARNINGS.

If the weekly gain in wages reported by 20,284 organized workers (aggregating \$28,060) were distributed among the 400,000 members of trade unions, the average weekly increase for each member would be 7 cents or slightly more than 1 cent a day each. But the average per diem earnings of all members reporting in the first and third quarters were \$2.76 in 1904 as compared with \$2.72 a year ago.\* On the other hand, the increases in 1903 were equivalent to 5½ cents a day per member and yet the per diem earnings fell off 3 cents (from \$2.75 in 1902 to \$2.72 in 1903). The explanation given of the apparent contradiction last year was the spread of trade unionism to the smaller towns and the unskilled occupations, resulting in a decreasing proportion of the more highly paid workmen. This year the membership reporting was nearly stationary; whatever changes took place were to the advantage of New York City, which increased its proportion of the total from 62 to 65 per cent. A considerable part of the metropolitan increase, however, was in organizations of laborers as distinguished from mechanics; thus the number of "excavators" reporting earnings increased from 6,000 in 1903 to 16,000 in 1904, and as they earned only \$1.50 a day, the effect of the increase was to bring down the average earnings in the building industry in the third quarter of 1904, as set forth in table 1 (page xliii). In the first quarter of 1904, when only 2,000 excavators were employed, the average per diem earnings in the building industry were \$3.41, as contrasted with \$3.22 in the third quarter. Of greater value is the average for the skilled trades alone; in the building industry the average earnings of mechanics per day were \$3.74 in the third quarter of 1904, as compared with \$3.60 in 1903 and \$3.50 in 1902. Taking the 20 leading occupations that are "organized" (compare table 7, page xxviii), the per diem earnings in the last three years have been as follows:

TABLE 5.—AVERAGE EARNINGS, PER DIEM, OF MALE MEMBERS OF WORKMEN'S ORGANIZATIONS IN THE LEADING TRADES, 1902-4.

	FIRST QUARTER.			THIRD QUARTER.		
	1902.	1903.	1904.	1902.	1903.	1904.

Firemen, stationary.....	2.24	2.24	2.20	2.13	2.17	2.07
Hod carriers.....	2.67	2.85	2.83	2.82	2.75	2.75
Iron molders.....	2.92	3.08	3.04	3.06	3.00	2.98
Machinists.....	2.58	2.67	2.67	2.70	2.69	2.79
Musicians.....	3.48	3.75	2.80	2.90	2.65	2.84
Painters and decorators.....	3.05	3.12	3.42	3.22	3.34	3.37
Seamen.....	.94	1.02	1.31	1.44	1.18	1.70
Team drivers.....	1.63	1.90	2.12	1.66	2.08	2.16
Trainmen.....	2.11	2.25	2.26	2.12	2.24	2.26

With a few exceptions (bricklayers and masons, stationary engineers, etc.), the notable increases in 1904 appear in such occupations as those of seamen and bakers, who receive, in addition to cash wages, board and lodging, for which no allowance has been made in the reports prior to the present year. In certain trades the value of this sustenance is a matter of contract between employer and employee, so that allowance can be made therefor in wages when it is not furnished; marine firemen, for example, receive 50 cents more a day when in port than when living on ship board.

While wages have very generally increased since 1897, it is an open question whether they have advanced as much as the cost of living. Yearly earnings in 1904, owing to the slackening in trade activity and the extensive labor disputes, actually declined, thus:

TABLE 6.—EARNINGS OF MALE MEMBERS OF LABOR ORGANIZATIONS.\*

YEAR.	First quarter.	Third quarter.	Sum of first and third quarters.	Quarterly mean.	Quarterly average.	Computed average for entire year.†	Computed number of days of employment in year.†
1897.....	\$144 95	\$174 40	\$319 35	\$159 67	\$162 50	\$650	254
1898.....	163 61	175 41	339 02	169 51	169 49	678	255
1899.....	172 27	197 20	369 47	184 73	186 63	747	273

1901.....	182 65	194 27	376 92	188 46	189 05	756	274
1902.....	184 12	197 22	381 34	190 67	191 33	765	278
1903.....	186 35	189 96	376 31	188 15	188 28	753	277
1904.....	175 62	195 58	371 20	185 60	186 20	745	270

\* The average quarterly earnings of working women were as follows:

	FIRST QUARTER.	THIRD QUARTER.
1897.....	\$86	\$92
1898.....	75	82
1899.....	96	117
1900.....	107	107
1901.....	105	109
1902.....	145	127
1903.....	116	112
1904.....	123	113

The phenomenal figures for 1902 were in the main due to high wages reported by some of the actresses.

† Being the quarterly average multiplied by 4.

The table gives both the quarterly *mean* and the quarterly *average* in order to show the slightly different results yielded by the two methods. If the number employed were the same in each quarter, the arithmetic mean would be identical with the true average; but as a matter of fact there are always more employed in the third quarter, and as earnings are also larger in that quarter, the result is that the true average is above the mean. But the difference is slight, ranging from 2 cents in 1898 to \$2.83 in 1897, and usually being less than \$1.

The average annual earnings are computed from the average of the first and third quarters of the year, the Bureau having found it impossible since 1899 to collect these quarterly reports for the entire year. Experience indicated that the six months embraced in the first and third quarters usually corresponded closely with the six months not covered by the reports; thus the average earnings in 1898, based on reports for the four quarters, were \$676 as compared with \$678, as above, for two quarters; and for 1899 they were \$748 as compared with \$747. In 1897 alone was the difference at all large (\$661 as against \$650, above).

Inasmuch as the average earnings per day have varied little since 1898, it might be expected that the fluctuations in yearly earnings would depend largely upon the duration of employment, and the last column of the table demonstrates that that is indeed the fact. The diminished earnings in 1900 are explained by the lessened employment and the same is true of the slighter decline in 1904.

The average earnings for three months last year were \$176 in a winter period and \$196 in a summer period, but the average in these cases is a very crude expression of actual relations, as scarcely one-third of the workmen reported earnings at all near the average, while more than one-fourth of them earned upward of \$225 each quarter, thus:

TABLE 7.—ORGANIZED WAGE WORKERS CLASSIFIED ACCORDING TO AMOUNT OF QUARTERLY EARNINGS.

	FIRST QUARTER.				THIRD QUARTER.			
	Number of members.		Distribution of each 100.		Number of members.		Distribution of each 100.	
	Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.

25- 49..	8,361	1,047	2.7	8.1	5,367	1,307	1.5	10.6
50- 74..	13,439	2,438	4.3	18.9	9,251	2,261	2.6	18.4
75- 99..	23,584	3,453	7.6	26.7	18,399	2,246	5.1	18.3
100- 124..	24,979	3,145	8.0	24.4	32,922	3,734	9.2	30.4
125- 149..	37,079	757	11.9	5.9	29,517	687	8.2	5.6
150- 174..	46,911	509	15.0	3.9	48,255	528	13.4	4.3
175- 199..	53,192	250	17.1	1.9	55,904	219	15.6	1.8
200- 224..	29,899	24	9.6	0.2	46,589	23	13.0	0.2
225- 249..	28,724	56	9.2	0.4	33,847	80	9.4	0.6
250- 274..	18,992	57	6.1	0.4	25,829	19	7.2	0.1
275- 299..	4,486	4	1.4	0.1	17,395	9	4.8	0.1
300- + ..	20,725	1,136	6.6	8.8	35,377	1,115	9.9	9.1
Total...	312,019	12,913	100	100	358,974	12,294	100	100

It appears that nearly 10 per cent of the women earned more than \$300 each quarter; they were all actresses and this inclusion naturally raises the average. In the first quarter, less than one-half of the women earned as much as \$100 and this *median* is a more accurate expression of the situation than the average. For the third quarter the median is slightly above instead of below \$100, whereas the average for the third quarter was \$10 less than that of the first quarter. For the men the median was about \$175 in the first quarter, which is nearly the same as the average, while in the third quarter it was somewhat under the average. Compared with previous years, there was an increase in the number of workmen who earned less than \$75 a quarter.\*

The next table reveals the average earnings in the several industries. It will be remembered that the highest wage rates were found in the building trades (theaters and music excepted, table 1, p. xliii); but these trades do not lead when it comes to annual earnings, because work in them is so irregular. Next to the theatrical profession, the typographical trades enjoy the largest

The last of the summary tables (S) exhibits the average earnings in the third quarter of each year since 1897, for all of the industries and the principal trades. Before making comparisons between 1904 and previous years, the fact must be noted that last year for the first time an allowance was made for board and lodging in certain occupations (seamen, cooks, waiters, bartenders, etc.), where the compensation includes "keep." This averages about \$4 a week or \$50 a quarter and of course tends to advance the averages in navigation (Group II), etc.

#### IV.

##### CHANGES IN THE HOURS OF LABOR.

In the current report of the Bureau of Factory Inspection will be found statistics concerning the normal hours of work in the manufacturing establishments of this State. They show that in 1904, for the first time, the normal workday of factory operatives was less than ten hours. A far-reaching movement has been under way in recent years to introduce the nine-hour day, and this has been largely successful in New York City and other large places. In the building trades the movement has been toward the eight-hour day or even 44 hours a week. The course of the shorter-hour movement last year may be traced by means of reports from labor organizations, which embrace in their membership not only factory operatives, but also workers in the building industry, transportation and communication, trade and commerce. A reduction in working hours is moreover seldom brought about otherwise than through the organized efforts of the workers themselves, that is, through trade-union activity.

In the twelve months ended September 30, 1904, the trade unions of the State reported only 66 members who had accepted longer working hours than they had previously enjoyed—substantially all of these being cement burners in Glens Falls, who went from an eight-hour to a twelve-hour schedule (seven days in the week). On the other hand, 6,900 wage earners secured a reduction in the hours of work amounting on the average to five and one-half hours a week. This is a much smaller number than in preceding years, as may be seen in the following comparative table for 1901-4:

CHANGES IN THE HOURS OF LABOR REPORTED BY TRADE UNIONS IN NEW YORK.

YEAR ENDED SEPT. 30—	DECREASES.			INCREASES.		NET REDUCTION.		
	Work'rs.	Total hours.	Average hours a week.	Work'rs.	Total hours.	All workers.	Total hours.	Average hours a week.
1901.....	26,147	202,308	8	319	1,323	26,466	200,985	7.6
1902.....	61,853	290,422	4.7	5,234	37,279	67,087	253,143	3.8
1903.....	21,636	112,870	5.2	342	2,919	21,978	109,951	5.0
1904.....	6,896	38,058	5.5	66	1,722	6,962	36,336	5.2

A year ago the number of workers who gained shorter hours was thrice as large as in 1904, while in 1902 it was nine times as

large. These figures are closely connected with the state of industrial activity. When business is very lively, there is so great a demand for labor that labor can make better terms for itself than at other times. The year 1902 witnessed the culmination of the latest period of prosperity beginning in 1897, and since then wage earners have been rather more content to secure work on the existing terms of employment and have not pressed forward so earnestly in the direction of still better conditions of employment.

The following table, which is a summary of Table X in the Appendix, reveals the industries or groups of trades concerned in the changes in hours in 1904:

CHANGES IN WEEKLY HOURS OF LABOR.

Total.....	6,896	38,058½	5.5	66	1,722	6,962	36,336½	5.2

## ANALYSIS BY INDUSTRIES.

Of the 1,065 workers in the building trades who secured shorter hours, 374, as just noted, won the eight-hour day; while all of the others, with the eight-hour day already won, established in addition the Saturday half-holiday. Hence the maximum weekly working time of these 1,065 wage earners is now 48 hours.

A somewhat larger number (1,563) of workers in the transport trades secured shorter hours of labor, which, however, still remain very long in comparison with the standard in other trades. The Brooklyn team drivers (550) and Buffalo grain handlers (172) reduced the weekly working time from 72 to 60 hours; but the railway employees (841) who reported shorter hours still work from 63 to 77 hours a week.

A majority of the 1,704 workers who appear under printing were really carriers (newspaper and mail deliverers) whose change was slight—a reduction from 55 to 53 hours a week. Mention has been made of the establishment of an eight-hour day by 285 lithographers. In addition 140 photo-engravers reduced their weekly working time from 48 to 46 2-3.

Of the 1,242 workmen appearing under “miscellaneous” a majority (718) are barbers in Buffalo, Rochester, Niagara Falls, etc., who reduced hours on an average of 3.8 hours a week.

#### THE EIGHT-HOUR MOVEMENT.

Only 1,155 union workmen established the eight-hour day in 1904, as compared with 5,833 in 1903. About one-half of them were metropolitan workers, the leading trades affected having been the lithographers (285 workmen), sail makers (122) and beer-pump makers (120). In the environs of the metropolis several of the building trades won the eight-hour day, notably the carpenters, painters and plumbers of Suffern (128 in all) and the bricklayers of Sloatsburg (100)—both in Rockland county. Nearer the city the eight-hour day already prevailed in the building trades, and the movement last year was toward securing the Saturday half-holiday (New Rochelle carpenters—127—and Great Neck painters—35). In the metropolis itself the changes in the building trades were of this character, the largest number of workmen affected having been some 400 pavers and rammermen.

No general eight-hour movement of the building trades occurred in any larger place than Suffern, but a few individual trades effected the change, notably the housesmiths in Syracuse and Utica, roofers and sheet-metal workers in Ithaca, etc.

Outside of the building trades, the eight-hour day was won by 125 stationary engineers and firemen in Syracuse, 70 clothing cutters in Rochester, 40 paper makers in Deferiet, and 20 compositors in Ossining and Tarrytown.

# APPENDIX:

## STATISTICAL TABLES.

### (a) SUMMARY TABLES.

#### NUMBER AND MEMBERSHIP OF ALL LABOR ORGANIZATIONS.

- A. New York State (March and September, 1904).
- B. New York City (March and September, 1904).
- C. Each County and Locality (September, 1904).

#### MONTHLY RETURNS OF REPRESENTATIVE UNIONS REGARDING THE STATE OF EMPLOYMENT.

- D. Number and membership of unions reporting.
- E. Number of members idle.
- F. Percentage of members idle.
- G. Causes of idleness (March and June).
- H. Causes of idleness (September and December).

#### QUARTERLY RETURNS FROM ALL UNIONS RESPECTING EMPLOYMENT AND EARNINGS.

- I. Employment and idleness of male unionists in the first quarter (January, February, March).
- J. Employment and idleness of female unionists in the first quarter.
- K. Employment and idleness of all unionists in the first quarter.
- L. Employment and idleness of male unionists in the third quarter (July, August, September).
- M. Employment and idleness of female unionists in the third quarter.
- N. Employment and idleness of all unionists in the third quarter.
- O. Quarterly earnings of male unionists in the first quarter.
- P. Quarterly earnings of female unionists in the first quarter.
- Q. Quarterly earnings of male unionists in the third quarter.
- R. Quarterly earnings of female unionists in the third quarter.
- S. Average earnings in the third quarter of each year, 1898 to 1904.

## DETAILED TABLES.

---

- I. Number and membership of labor organizations, March and September, 1904: By industries, trades and localities.
- II. Number and membership of labor organizations, September, 1904: By counties, localities and trades.
- III. Membership, employment, idleness, etc., March, 1904:
  - (a) Summary and recapitulation by counties and localities.
  - (b) Localities and trades.
- IV. Employment and idleness, by industries and trades.
  - (a) First quarter — January, February and March.
  - (b) Third quarter — July, August and September.
- V. Rates of wages and hours of labor reported by each labor organization, September, 1904.
- VI. Earnings of organized wage workers by trades and localities:
  - (a) First quarter — January, February and March.
  - (b) Third quarter — July, August and September.
- VII. Duration and employment and amount of earnings of each member of labor organizations:
  - (a) First quarter — January, February and March.
  - (b) Third quarter — July, August and September.
- VIII. Changes in rates of wages reported by labor unions, October 1, 1903—September 30, 1904.
- IX. Changes in wages reported by manufacturers in same period.
- X. Changes in the hours of labor reported by trade unions, October 1, 1903—September 30, 1904.
  - (a) Increases.
  - (b) Decreases.
  - (c) Recapitulation.

# INDEX.

The table of contents in the front of this volume contains a general index. In addition, the following index to the statistics of organized labor has been prepared. Page references are given for each industry or group of trades, following which is an alphabetical list of all trades, with the number of the industry or group in which each is classified. The statistics for cities, towns and villages begin on pages 99 and 144 (unions and membership) and 144 (employment and idleness).

INDUSTRY GROUPS.	III.  Trade unions.	V.  Rates of wages and hours of labor.	VI.  EARNINGS.		VII.  DURATION OF EMPLOYMENT, ETC.	
			First qr.	Third qr.	First qr.	Third qr.

## INDEX TO CLASSIFICATION OF TRADES.

Actors and actresses, VIII.	Beer pump makers, IV.
Amalgamated engineers (blacksmiths, machinists, etc.), IV.	Belt lacers, XIII.
Architectural brass and bronze workers, IV.	Beverages, VII.
Architectural iron workers, IV.	Bevelers (glass), XIII.
Arc lamp trimmers, XIII.	Bill posters, VIII.
Artificial stone masons, I.	Blacksmiths, IV.
Ashmen, II.	Blacksmiths' helpers, IV.
Asphalt laborers, I.	Blasters, I.
Automobile drivers, II.	Bleach powder workers, XIII.
	Blockers (hat and cap), III.
	Bluestone cutters, I.
	Bluestone cutters' helpers, I.
Baggage handlers, II.	Boatmen II.
Bag makers, XIII.	Boiler felters (steam), I.
Bakers, VII.	Boilers makers, IV.
Bar fixture workers, VI.	Boiler makers' helpers, IV.
Barbers, XIII.	Bookbinders, V.
Bartenders, X.	Bootblacks, X.
Bedspring makers, IV.	Boot and shoe workers, III.
Bedding and mattress makers, VI.	Bottle blowers, XIII.
Beer bottlers, drivers, etc., VII.	Bottlers (beer, mineral water), VII.

- Box makers and sawyers, VI.  
 Box makers (paper), XIII.  
 Boys' sailor suit makers, III.  
 Brass finishers, molders, spinners, workers, IV.  
 Bread peddlers, X.  
 Brewery employees, VII.  
 Brick and cement, I.  
 Bricklayers and masons, I.  
 Bricklayers' laborers, I.  
 Bridgemen, I.  
 Bridge tenders, XI.  
 Britannia workers, IV.  
 Bronze workers, IV.  
 Broom makers, VI.  
 Brush makers, VI.  
 Bunchers (metal), IV.  
 Buffers (leather), XIII.  
 Building laborers, I.  
 Building material handlers, I.  
 Building trades, I.  
 Butchers, VII.  
 Button makers, XIII.  
 Buttonhole makers, III.  
 Cab-driving, II.  
 Cabinet makers, VI.  
 Cabmen, II.  
 Cable splicers (electrical), I.  
 Calsson and foundation workers, I.  
 Calcium-light operators, VIII.  
 Calkers (pipe), I.  
 Calkers (ship), IV.  
 Can makers (tin), IV.  
 Cap blockers, cutters, finishers and trimmers, lining makers, makers, operators, packers, sweat band cutters, III.  
 Car builders, painters and repairs, II.  
 Car pipe fitters, IV.  
 Car spring fitters, IV.  
 Car workers, II.  
 Carpenters and joiners, I.  
 Carpenters (ship), IV.  
 Carpet fitters and layers, VI.  
 Carpet store employees, X.  
 Carpet weavers, III.  
 Carriage spring makers, IV.  
 Carriage workers, VI.  
 Carvers (wood), VI.  
 Carvers (marble), I.  
 Case makers (jewelry and silverware), XIII.  
 Cement laborers, I.  
 Cement workers, I.  
 Cereal workers, VII.  
 Chandeller filers, IV.  
 Chandeller makers, IV.  
 Chasers, IV.  
 Check-book makers, V.  
 Cigar makers, IX.  
 Cigar packers, IX.  
 Cigarette makers, IX.  
 Clerks (post-office), XI.  
 Clerks (railway), II.  
 Clerks (railway mail), XI.  
 Clerks (retail), X.  
 Clip sorters, XIII.  
 Cloak cutters, III.  
 Cloak makers, III.  
 Cloth cap blockers, cutters, finishers, lining makers, operators, packers, trimmers, III.  
 Cloth examiners, III.  
 Cloth hat blockers, cutters, finishers, lining makers, operators, packers, trimmers, III.  
 Cloth spongers, III.  
 Cloth refinishers, III.  
 Cloth weavers, III.  
 Clothing cutters, III.  
 Coach drivers, II.  
 Coal handlers, II.  
 Coal heavers, II.  
 Coat makers, III.  
 Color mixers, XIII.  
 Compositors, V.  
 Conductors, II.  
 Confectioners, VII.  
 Cooks, VII.  
 Cooks and stewards (marine), II.  
 Coopers, VI.  
 Coppersmiths, IV.  
 Core makers, IV.  
 Core makers' apprentices, IV.  
 Core makers (brass foundries), IV.  
 Costumers (theatrical), VIII.  
 Cranemen, IV.  
 Curriers, XIII.  
 Cutters (bluestone), I.  
 Cutters (cap), III.  
 Cutters (cloak), III.  
 Cutters (clothing), III.  
 Cutters (flint glass), XIII.  
 Cutters (freestone), I.  
 Cutters (glove), III.  
 Cutters (granite), I.  
 Cutters (hat), III.  
 Cutters (knit goods), III.  
 Cutters (lining), III.  
 Cutters (marble), I.  
 Cutters (neckwear), III.  
 Cutters (paper), XIII.  
 Cutters (paving block), I.  
 Cutters (pipe), IV.  
 Cutters (stone), I.  
 Cutters (suit), III.  
 Cutters (wall paper print), V.  
 Cutters' helpers (bluestone), I.  
 Cutters' helpers (marble), I.  
 Decorative glass workers, XIII.  
 Derrick makers, IV.  
 Derrickmen, I.

- Die sinkers, IV.  
 Dock builders, XI.  
 Double drum holster runners, I.  
 Dredgemen, I.  
 Drillers (rock), I.  
 Drivers (automobile), II.  
 Drivers (beer), VII.  
 Drivers (coach), II.  
 Drivers (ice cream), X.  
 Drivers (municipal employees), XI.  
 Drivers (mineral water), VII.  
 Drivers (team), II.  
 Dry dock employees, IV.  
 Dyers (textile), III.
- Edge gilders (book), V.  
 Egg inspectors, VII.  
 Electrical apparatus makers, IV.  
 Electrical workers, I.  
 Electrical workers (arc light trimmers), XIII.  
 Electrical workers (cable splicers), I.  
 Electrical workers (linemen), I.  
 Electrotypers, V.  
 Elevated railroad employees, II.  
 Elevator constructors, I.  
 Engine makers (steam), IV.  
 Engineers (amalgamated), IV.  
 Engineers (brewery employees), VII.  
 Engineers (eccentric), XII.  
 Engineers (hod-holsting), XII.  
 Engineers (marine), II.  
 Engineers (railroad), II.  
 Engineers (stationary), XII.  
 Engravers, IV.  
 Engravers (copper-plate), V.  
 Engravers (steel-plate), V.  
 Engravers (watch-case), IV.  
 Excavators, I.
- Felt workers (building), I.  
 Fiber sanders, XIII.  
 Fiber workers, XIII.  
 Finishers (brass), IV.  
 Finishers (hat and cap), III.  
 Finishers (textile), III.  
 Finishers (leather), XIII.  
 Firemen (brewery employees), VII.  
 Firemen (eccentric), XII.  
 Firemen (marine), II.  
 Firemen (railroad), II.  
 Firemen (stationary), XII.  
 Fishermen, XIII.  
 Flint-glass workers, XIII.  
 Florists, XIII.  
 Flour workers, VII.  
 Floor layers, I.  
 Floor polishers, I.  
 Food preparation, VII.  
 Foundation workers, I.  
 Foundry laborers, IV.  
 Framers, I.
- Frame makers (picture), VI.  
 Freestone cutters, I.  
 Freight handlers, II.  
 Furnace tenders (brass), IV.  
 Fur workers, III.  
 Furniture and carpet store employees, X.
- Galvanizers, IV.  
 Gardeners, XIII.  
 Gardeners (park), XI.  
 Garments, III.  
 Garment workers, III.  
 Gas fitters, I.  
 Gas fixture hangers, I.  
 Gas meter makers, IV.  
 Gas workers, XIII.  
 Gas-well workers, XIII.  
 Gilders, I.  
 Gilders (book), V.  
 Glass bevelers, embossers, polishers and silverers, XIII.  
 Glass bottle blowers, XIII.  
 Glass workers (decorative, flint glass, green glass, window glass), XIII.  
 Glaziers, XIII.  
 Glove cutters, III.  
 Glove makers (leather), III.  
 Gold beaters, IV.  
 Gold layers (book cover), V.  
 Gold pen makers, IV.  
 Grain shovelers, II.  
 Granite cutters, I.
- Hammer makers, IV.  
 Hand rubbers (stone), I.  
 Harness makers, XIII.  
 Hat blockers, cutters, finishers, lining makers, operators, packers, sweat band cutters, trimmers, III.  
 Hat tip printers, V.  
 Holster runners (double drum), I.  
 Horse-nail makers, IV.  
 Horsehoers, IV.  
 Hospital employees, XI.  
 Hostlers (municipal employees), XI.  
 Hot water fitters, I.  
 Hotels and restaurants, X.  
 House shorers and movers, I.  
 Housesmiths, I.
- Ice cream salesmen and drivers, X.  
 Ice handlers, II.  
 Inspectors (lumber), II.  
 Iron miners, XIII.  
 Iron molders, IV.  
 Iron molders' apprentices, IV.  
 Iron molders' helpers, IV.  
 Iron workers, IV.
- Jacket makers, III.  
 Jack spinners, III.  
 Janitors (public schools), XI.

- Jewelers, IV.  
 Jewelry case makers, XIII.  
 Kitchen outfitters, I.  
 Knee-pants makers, III.  
 Knit-goods cutters, III.  
 Knitters, III.  
 Laborers (asphalt), I.  
 Laborers (bricklayers'), I.  
 Laborers (building), I.  
 Laborers (cement), I.  
 Laborers (foundry), IV.  
 Laborers (masons') I.  
 Laborers (plumbers'), I.  
 Laborers (street), I.  
 Lamp trimmers (electric arc), XIII.  
 Lathers, I.  
 Lathers (metal), I.  
 Laundry workers, III.  
 Leather buffers, XIII.  
 Leather dressers, XIII.  
 Leather workers, XIII.  
 Letter carriers, XI.  
 Linemen, I.  
 Lining makers (hat and cap), III.  
 Lithographers, V.  
 Locomotive painters, II.  
 Locomotive pipe fitters, IV.  
 Longshoremen, II.  
 Loom fixers, III.  
 Lumber handlers, II.  
 Lumber inspectors, II.  
 Machine shop workers, IV.  
 Machine stone workers and hand rubbers, I.  
 Machine wood workers, VI.  
 Machinery riggers, IV.  
 Machinists, IV.  
 Machinists' apprentices, IV.  
 Mail deliverers, V.  
 Mailers, V.  
 Malt liquors, VII.  
 Maltsters, VII.  
 Marble cutters, I.  
 Marble cutters' helpers, I.  
 Marble mosaic workers, I.  
 Marble mosaic workers' helpers, I.  
 Marble polishers, rubbers and sawyers, I.  
 Marblers (book), V.  
 Marine cooks and stewards, II.  
 Marine engineers, II.  
 Marine firemen, II.  
 Masons, I.  
 Masons (artificial stone), I.  
 Masons (stone), I.  
 Masons' helpers, I.  
 Masons' laborers, I.  
 Masters and pilots, II.  
 Matmakers, VI.  
 Mattress makers, VI.  
 Meat cutters, VII.  
 Metal buffers, platers and polishers, IV.  
 Metal painters, IV.  
 Metal spinners, IV.  
 Metal workers (sheet), I.  
 Meter workers (gas), IV.  
 Milk bottlers, VII.  
 Milk peddlers, X.  
 Millers, VI.  
 Millwrights, I and VI.  
 Mineral water bottlers, VII.  
 Miners (iron), XIII.  
 Mixed employment, XIII.  
 Modelers, VI.  
 Molders (brass), IV.  
 Molders (iron), IV.  
 Molders' helpers (iron), IV.  
 Mosaic workers' helpers (marble), I.  
 Motormen (iron works), IV.  
 Mule spinners, III.  
 Musicians, VIII.  
 Navigation, II.  
 Neckwear cutters, III.  
 Neckwear makers, III.  
 Newsboys, X.  
 Newspaper deliverers, V.  
 Newspaper writers, V.  
 Oil well workers, XIII.  
 Optical workers, XIII.  
 Ore handlers, II.  
 Organ workers, VI.  
 Overall workers, III.  
 Oystermen, XIII.  
 Painters and decorators, I.  
 Painters (iron and steel), IV.  
 Painters (car and locomotive), II.  
 Painters (ship), IV.  
 Pants makers, III.  
 Paper bag and box makers, XIII.  
 Paper cutters, V.  
 Paper hangers, I.  
 Paper makers, XIII.  
 Paper rulers, V.  
 Park gardeners, XI.  
 Park employees, XI.  
 Parquet floor layers, I.  
 Parquet floor polishers, I.  
 Pattern makers, IV.  
 Pavers and rammers, I.  
 Paving block cutters, I.  
 Paving trades, I.  
 Peddlers (bread), X.  
 Peddlers (milk), X.  
 Pen makers (gold), IV.  
 Photo-engravers, V.  
 Piano workers (action makers, bellymen, fly finishers, finishers, movers, regulators, rubbers, varnishers, etc.), VI.  
 Picture frame makers, VI.  
 Pilots, II.

- Pipe calkers and tappers, I.  
 Pipe cutters, IV.  
 Pipe felters, I.  
 Pipe fitters (steam), I.  
 Pipe fitters (car and locomotive), IV.  
 Pipe makers (smoking), VI.  
 Plasterers, I.  
 Plasterers' helpers, I.  
 Plate printers, V.  
 Platers (metal), IV.  
 Plumbers, I.  
 Plumbers (ship), IV.  
 Plumbers' helpers, I.  
 Plumbers' laborers, I.  
 Pointers, I.  
 Polishers, VI.  
 Polishers (floor), I.  
 Polishers (furniture), VI.  
 Polishers (marble), I.  
 Polishers (metal), IV.  
 Polishers (glass), XIII.  
 Post-office clerks, XI.  
 Power house workmen, XII.  
 Pressers, III.  
 Press feeders, V.  
 Pressmen, V.  
 Pressmen's assistants, V.  
 Print cutters (wall paper), V.  
 Printers (hat tip), V.  
 Printers (plate), V.  
 Printers (wall paper machine), V.  
 Public employment, XI.  
 Public school janitors, XI.  
 Pulp workers, XIII.  
 Pump makers (beer), IV.  
  
 Quarrymen, I.  
  
 Railroad employees, II.  
 Railroad (elevated) employees, II.  
 Railroad telegraphers, II.  
 Railway clerks, II.  
 Railway (street) employees, II.  
 Railway mail clerks, XI.  
 Railways and telegraphs, II.  
 Rammermen, I.  
 Range mounters and setters, I.  
 Rattan workers, VI.  
 Reed workers, VI.  
 Refinishers (cloth), III.  
 Restaurant employees, X.  
 Retail trade, X.  
 Ribbon weavers (silk), III.  
 Riggers, I.  
 Riggers (ship and machinery), IV.  
 Rock drillers, I.  
 Rockmen, I.  
 Rolling-mill employees, IV.  
 Roofers, I.  
  
 Sail makers, IV.  
 Sailor suit makers (boys'), III.  
  
 Salesmen, X.  
 Saw makers, IV.  
 Sawyers (box), VI.  
 Sawyers (marble), I.  
 Sea food workmen, VII.  
 Seamen, II.  
 Sheet metal workers, I.  
 Ship builders, IV.  
 Ship carpenters, IV.  
 Ship calkers, IV.  
 Ship painters, IV.  
 Ship plumbers and steam fitters, IV.  
 Ship riggers, IV.  
 Shirt cutters and operators, III.  
 Shoe workers, III.  
 Silk ribbon weavers, III.  
 Silver workers, IV.  
 Silverware case makers, XIII.  
 Skirt makers, III.  
 Smoking pipe makers, VI.  
 Soap makers, XIII.  
 Spar makers, IV.  
 Spinners (brass), III.  
 Spinners (jack), III.  
 Spinners (mule), IV.  
 Spongers (cloth), III.  
 Spring fitters (car), IV.  
 Spring makers (bed), IV.  
 Spring makers (carriage and wagon), IV.  
 Stage mechanics, VIII.  
 Stair builders, I.  
 Stationary engineers, XII.  
 Steam boiler felters, I.  
 Steam engine makers, IV.  
 Steam fitters, I.  
 Steam fitters (ship), IV.  
 Steam fitters' helpers, I.  
 Steam pipe felters, I.  
 Steam shovel men, I.  
 Steel cabinet makers, IV.  
 Steel plate engravers, V.  
 Steel works employees, IV.  
 Stereotypers, V.  
 Stewards (marine), II.  
 Stone cutters, I.  
 Stone cutters' helpers, I.  
 Stone masons, I.  
 Stone setters, I.  
 Stone workers (machine), I.  
 Stone working, I.  
 Store-fixture workers, VI.  
 Stove mounters, IV.  
 Street cleaners, XI.  
 Street laborers, I.  
 Street railway employees, II.  
 Suit cutters, III.  
 Suit makers (boys' sailor), III.  
 Surgical instrument makers, IV.  
 Suspender makers, III.  
 Suspender trimmings makers, III.  
 Sweat band cutters (hat and cap), III.  
 Switchmen, II.
